

# MONETRA<sup>®</sup>

Integrated Payment Software

Application  
Developers

- Runs natively on all popular operating systems
- Keeps your applications independent with support for all major transaction processors
- Reliable, non-stop processing with sophisticated, automatic communications fail-over
- Protects sensitive data with comprehensive PA-DSS and PCI compliance
- Supports industry standard XML protocols
- API's available in C/C++, C#, VB.Net, Java, Perl, PHP and Delphi
- Simple and scriptable installation for remote or unattended deployment and upgrades

Contact us now for Reseller/Partner information

If you create point of sale systems or other applications that perform credit card/debit card/gift card functions, Monetra<sup>®</sup> will give you the performance and flexibility you need for today's competitive market. With Monetra, you'll get instant, out-of-the-box security that runs natively and very efficiently on all popular operating systems, with a variety of service-based, open API's and library connectivity features. Support for all major processors means no lost sales, because you can easily address every customer's banking requirements. And using Monetra keeps your technical resources focused on your products and customers instead of chasing those ever-changing credit card industry mandates. Extensive remote management and diagnostics let you deliver world-class support.

# MONETRA<sup>®</sup>

Integrated Payment Software

Monetra<sup>®</sup> provides a rich set of features and capabilities to support every application:

- Built-in data encryption and multi-user password support
- Supports secure SSL communications for incoming and outgoing connections
- Connects via dial-up modem, high-speed Internet and Frame Relay/Leased Lines
- Concurrently supports unlimited merchant accounts through multiple processing institutions
- Protects sensitive data with comprehensive PA-DSS and PCI compliance. API's available in C/C++, C#, VB.Net, Java, Perl, PHP and Delphi

## Hardware Requirements:

Monetra<sup>®</sup> supports 32-bit and 64-bit Intel, 64-bit Sparc, and 64-bit PPC CPU architectures, with minimal requirements for memory and disk space. Monetra runs easily on virtually any typical computer system, even when the computer is also running other applications such as point-of-sale software. Custom builds for embedded devices are also available. Additional memory and a separate database server are recommended for extremely high-performance applications.
