

# MONETRA<sup>®</sup>

Integrated Payment Software

Ecommerce

- High-speed transaction processing capable of thousands of transactions per minute
- Fits any application requirement from one merchant to thousands
- Reliable, non-stop processing with automatic communications fail-over
- Protects sensitive data with comprehensive PA-DSS and PCI compliance
- Supports Verified by Visa, MasterCard SecureCode, AVS, and card security codes to control fraud

Speed is key for successful Ecommerce; your competitors are just one click away. Slow response times mean abandoned shopping carts and lost sales. You need a payment processing solution that's fast and reliable so you can provide an optimal shopping experience even during busy, peak-load periods. Monetra<sup>®</sup> gives you all that and more; with built-in support for address verification, CVV2/CVC2/CID card security verification, and Verified by Visa and MasterCard SecureCode. Monetra also offers secure card storage and card number tokens for PCI-compliant card-on-file applications.

# MONETRA<sup>®</sup>

Integrated Payment Software

Monetra<sup>®</sup> provides a rich set of features and capabilities to support every application:

- Built-in data encryption and multi-user password support
- Supports secure SSL communications for incoming and outgoing connections
- Connects via dial-up modem, high-speed Internet and Frame Relay/Leased Lines
- Concurrently supports unlimited merchant accounts through multiple processing institutions
- Protects sensitive data with comprehensive PA-DSS and PCI compliance. API's available in C/C++, C#, VB.Net, Java, Perl, PHP and Delphi

## Hardware Requirements:

Monetra<sup>®</sup> supports 32-bit and 64-bit Intel, 64-bit Sparc, and 64-bit PPC CPU architectures, with minimal requirements for memory and disk space. Monetra runs easily on virtually any typical computer system, even when the computer is also running other applications such as point-of-sale software. Additional memory and a separate database server are recommended for extremely high-performance applications.
